

PEACE CORPS
Overseas Request for Quotation (RFQ) for Construction Services

RFQ Number: PR2026-07-027

Date: July 23, 2026

Peace Corps Guinea invites qualified and experienced vendors to submit a quotation for the supply, installation, and commissioning of a complete photovoltaic solar power system at its Training Site in Dubreka - Guinea.

The point of contact for this Request for Quotation (RFQ) is the following individual:

Name: Branden Gallia
Title: Director of Management and Operations
Address: Peace Corps Guinea
E-mail Address: gn-procurement@peacecorps.gov

Written questions about this RFQ may be sent to the point of contact listed above before the quotation due date. No phone calls please.

All interested vendors should participate in an on-site inspection on August 7, 2026, from 9:00 -10:00 a.m. GMT at the address below.

If you are interested in submitting a quotation, please do so by sending your completed and signed Attachment 1—Vendor Quotation Form by e-mail to: gn-procurement@peacecorps.gov OR drop your proposal by the Security Officers at Peace Corps Office in Conakry. Quotations are due no later than **11:59pm, August 15, 2026**. Late quotations will not be accepted.

Peace Corps will evaluate all quotations received by the deadline based on the minimum requirements and/or evaluation factor(s) shown below. Contingent on the availability of funds and continued need for the construction services, at the end of the evaluation process, Peace Corps intends to award a firm-fixed-price contract for the purchase of the required construction services to the selected vendor.

A. Statement of Work/Description of Requirements

Peace Corps Guinea is seeking to install a solar photovoltaic system at its Training Center in Dubreka. The selected vendor will be responsible for the design, procurement, delivery, installation, testing, and commissioning of a full solar energy solution. The scope of this project is to:

Provide services to design and install a hybrid photovoltaic electric power system which will work in conjunction with energy from diesel generators and/or utility service provider (EDS) to charge batteries that will fully power the training office's energy requirements overnight – estimated at 45KW. More specifically the contractor shall provide all labor, equipment and materials necessary to perform the following tasks:

- a) Design and install a grid tie solar power system which includes photovoltaic modules, DC/AC inverters; connecting to the Automatic Transfer Switch (ATS). This ATS has provisions to also connect to the local national grid supply (EDS), and onsite diesel generators.
- b) Based on the size of the room where batteries are to be installed, the scope should include provisions of 30 Kw (1 or more) inverter with the supporting battery bank(s). Proposals shall include the maximum generating capacity of the 45Kw system(s) – measured in KVA, and an estimate of the amount of energy that the system produces on an annual basis.
- c) Install the approved hybrid solar power system. This shall include installation of all designed components to include batteries; electrical components, installation, and labor; and any other component and installation needed to provide a complete and operable working system. Provide and supply all Operation and Maintenance Manuals, as-built drawings and hands-on training needed for on-site staff to operate and maintain the system in a safe and efficient manner.

d) For the purpose of this contract, Peace Corps is requesting potential vendors to price out the supplies needed, installation inclusive of labor. (See list of materials)

Detailed list of materials

No.	Description	Quantity
1	580-620w dual-sided solar panels	72
2	50kw Three-phase inverter	1
3	60kwh High voltage Lithium Battery	1rack
4	boite combineur pour 6 strings	1
5	100A-AC differential circuit breaker	1
6	4P-AC Surge protector	1
7	Jeux de barres	1
8	Cabinet 800/600	2
9	Cable 2x10mm	8 Rolls
10	Cable 4X35mm	150m
11	Cable 4X6mm	1
12	Cable 1x10mm	1
13	Flexible conduit D32	10 Rolls
14	Thermo sleeve (red, black, green and blue)	4
15	Cable duct 100x50	15 barres
16	Collar (Colson belt) 20	8 paquets
17	Fixed aluminum panel support	39 barres
18	Insulation glue	10
19	Parker screws	10
20	Anchor n=8	5
21	Anchor n=12	4
22	Lag screw	1
23	Grounding rod	6
24	Bare earth cable D25	30m
25	ATS (Automated Transfer Switch)	1

The Contractor must compensate workers (direct employees, contractors, sub-contractors, consultants, etc.) under this contract in accordance with the applicable labor or other laws. The Contractor must create and maintain conditions at the work site that will reasonably assure the safety of its workers (direct employees, contractors, sub-contractors, consultants, etc.).

The Contractor shall be responsible for obtaining any necessary licenses and permits, and for complying with any Federal, State, and municipal laws, codes, and regulations applicable to the performance of the work.

The Contractor shall maintain liability insurance for the full period of performance in either the minimum amounts specified by applicable Federal, State, or municipal laws, codes, and regulations, or in an amount adequate to cover the cost of buildings/structures under construction should there be a complete loss, whichever is greater.

The Contractor is responsible for ensuring the safety and security of Peace Corps personnel, property, and operations throughout the duration of this construction project. This includes implementing and maintaining all necessary measures to safeguard the site and minimize any risks to Peace Corps staff and assets.

B. Place of Performance and Required Work or Delivery Schedule

Quartier Bagagoundo, between the cemetery and the mosque, Dubreka center

C. Contract Terms and Conditions

As an Agency of the United States Government, Peace Corps has an approved contract template that it intends to use for the award. Peace Corps reserves the right to deny making a contract award to a vendor should they refuse to sign the Peace Corps approved contract template.

D. Minimum Criteria:

A quotation will not be considered further if it does not meet the following minimum criteria:

- Quotation submitted is complete, signed, and submitted by the stated deadline. This includes the vendor certifying that the vendor:
 - Is a legally registered entity in Guinea (RCCM, NIF, QUITUS FISCAL)
 - If a business license is required to perform the construction services described in this solicitation in Guinea, holds an active business license [and submits the license in the submission documents](#).
 - Is not suspended, barred, or otherwise ineligible to do business with the US Government or its agencies.
 - Did not participate in the preparation of, and is not connected to (i.e. is not a parent or subsidiary of, or share staff of) a vendor that participated in the preparation of the design documents, drawings, specifications, or Independent Government Cost Estimate for this construction project.
 - Has adequate financial resources, or the ability to acquire adequate financial resources through channels apart from the Peace Corps, to complete the project at the prices quoted.
 - Has not declared bankruptcy, is not involved in bankruptcy or receivership proceedings, and there is no judgment or pending legal action against the vendor that could impair its operations in the foreseeable future.
 - Has not and will not:
 - Offer or give a gratuity (e.g. an entertainment or gift) or payment to an officer, official, or employee of the US Government with the intent to obtain a contract or favorable treatment under a contract.
 - Pay any individual or organization (an agent/agency) to solicit, improperly influence, or obtain a government contract in exchange for a contingent fee.
 - Provide or attempt to provide or offer to provide any kickback in its direct business relationships.
 - Will provide proof of holding adequate liability insurance prior to contract award.

E. Evaluation Factors:

Quotations that meet the minimum criteria listed above may be further evaluated based on the following factors:

- Past Performance: Vendor must show satisfactory results on at least 3 previous construction projects, demonstrating quality work, adequate staffing, and adherence to the schedule.
- Personnel Qualifications: Vendor must provide a team of at least 5 qualified staff members, including a minimum of 2 with professional diplomas.
- Equipment Capability: Vendor must independently provide all required equipment, demonstrating clear availability, reliability, and proper maintenance condition.
- Construction Methodology: Proposal must include clear installation drawings and a feasible construction methodology, with effective site management, safety measures, and quality/risk management.
- Planning & Schedule: Vendor must present a realistic project timeline with adequate resource allocation and flexibility for delays.
- Technical Specifications: Proposal must comply with all required standards, use quality materials, and present reasonable labor costs with any added technical value.
- Payment Terms & Price: The vendor must provide fully transparent and feasible payment terms accompanied by a comprehensive cost proposal that demonstrates a clear, reasonable, and well-substantiated price aligned with prevailing local market conditions.

Costs will be evaluated separately from the elements specified above.

As this solicitation is for the award of a fixed price contract, any error noted above with respect to inadequate amounts of materials, or underestimated prices, shall be borne solely by the Contractor. No additional sums will be payable because of any escalation in the cost of materials, equipment, and services or labor, or because of the contractor's failure to properly estimate or accurately predict the cost or difficulty of achieving the results required by this contract. Nor will the contract price be adjusted because of fluctuations in currency exchange rates. Changes in the contract price or time to complete will be made only due to changes made by the Government in the work to be performed, or by delays caused by the Government.

Award may be made with or without negotiations between the Peace Corps and the selected vendor. Award may be made to a responsible vendor that provided the lowest priced technically acceptable quotation, or to a responsible vendor other than the one that provided the lowest priced quotation, should that vendor be determined to have provided the best value quotation to the Peace Corps taking technical and cost factors into account.

The Peace Corps reserves the right to reject quotations that are unreasonably low or high in price.

All vendors that submit quotations in response to this RFQ will be notified of the results.
